Best Practice

1) Title of the Practice

Installation of clay pots for sparrow

2) Objectives of the practice

Water should be available in summer for birds.

To create awareness amongst the students

3) The context

In rainy days water is available everywhere for all Animals. But as season over water bodies get dried. Birds need fresh clean water for drinking and bathing. Most birds drink water every day. They also seem to enjoy bathing to clean their plumage and Remove Parasites. This initiative is ensuring these beautiful birds do not get dehydrated. There has been drive to create awareness amongst the student for installing water pots for birds during summer .This initiative need to great appreciation.

4) The Practice:-

water clay pots were hanged to trees balconies on 20th March on the occasion of World Sparrow Day. Shallow earthen pots are preferred.

A team of volunteer students taking care of pots mean cleaning of pots & refilled it with water.

5) Evidence of success

It is commonly seen that birds, squirrels were drink water from clay pots.

6) Problems encountered

There are groups of monkeys are stayed in college campus. Many times clay pots broken due to jumping of monkeys.

7) Notes

By taking inspiration from this activity student installed clay pots at their terrace gardens field &even at trees on public places. Since 20 March 2019 to till date practice is continued.

Hanging Clay Pots and bird feeders for birds

Hanging Clay Pots for Birds
