Department of Botany

Shri Shivaji Education Society Amravati's,
Shri Shivaji Science and Arts College, Chikhli Dist. Buldana,
Department of Botany

Organized the Field Visit to KVK Buldana on 22nd October 2021 for
Practical and Demonstration Purpose of Six Month Certificate Course
in Plant Propagation and Nursery Management

Name of Activity–Field Visit to KVK Buldana

Name of Student –Miss. Pallavi Kharat

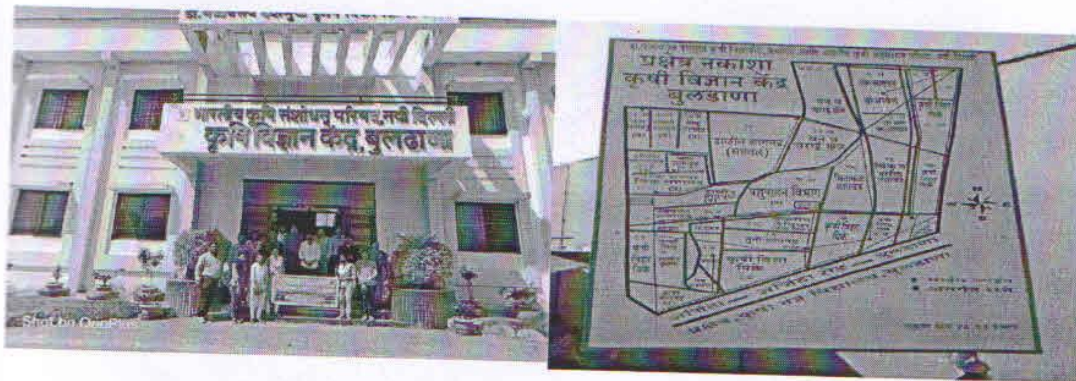

Academic Year 2020-21

Report On KVK Visit

Field Visit Report of KVK Buldana

As per the requirement of our syllabus we the students of Department Of Botany on the 22 October 2021 headed by our HOD Dr. V. U. Pocchi Madam, Mr. Gavande sir, Mr. Kolte sir had gone on educational visit to the KrishiVidnyan Kendra Buldhana. We went to buldhana from chikhli at 9:30 AM.

These KVK's are functioning as a science based grass-root organisation and need based resource oriented vocational training to farmers, farm women, rural youth and state. Objectives Of KVK are: transfer of technology to the farmer, to take the field trials of the newly released varieties, to provide knowledge of new adapted technology of farming, to give information about soil fertility and soil status, evaluation of improved breeds inside to soil and water, greenhouse technology.

On reaching the KVK we are greeted by the clean and well maintained entrance way leading to high roof building in which all the administration and business in transactions of the KVK are being done. KVK has well developed nursery unit, vermicompost, seed processing center, soil testing laboratory, agricultural implements and many other facilities are also available.

First after formal introduction we visited the plant nursery. The nursery is more or less Botanical park that boasts of being home to

Field Visit Report of KVK Buldana

number of varieties of fruit bearing trees like guava, mango and different species of plants. This beautiful nursery is taken care by the agricultural society. The society has been managing the KVK with an aim to nurture and preserve flora of region. The well managed nursery consists of guava, mango, lemon, orange, custard and other plant species produced by grafting, air layering. They use the advance propagation techniques including grafting, air layering. They demonstrated us the grafting of mango, and also tell us about the contents of fertile soil. They showed us vermicompost plan.

Then we visited Weather Forecasting Unit, Mr. Anil Taru sir introduced us this unit. Weather forecasting is the application of science and technology to predict the conditions of the atmosphere for a given location and time. Weather forecasts are made by collecting quantitative data about the current state of the atmosphere using meteorology to project how the atmosphere will change at a given place. They tell us

Field Visit Report of KVK Buldana

about the changes in atmosphere, they record the changes in atmosphere of Buldhana, Chikhli region.

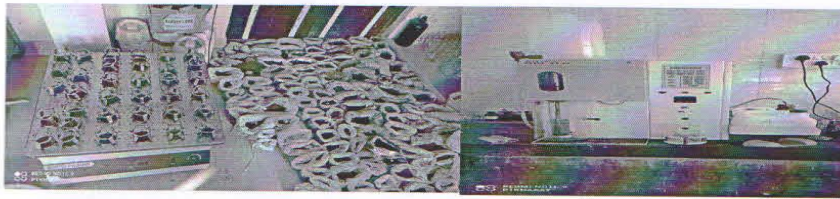

We visited the seed processing center where they focus on major items improving productivity of soybean, cotton, chickpea, pigeon pea, green gram, black gram. Along seed processing they tell us about the advanced agricultural implements. These tools help farmer in agriculture to improve quality and quantity in less time without much efforts.

They showed us their cultivation of guava, pomegranate, custard apple. They have also used the irrigation system all over the nursery.

At the last we visited the soil testing centre where Miss Bhople described the soil testing and analysis procedure. In this laboratory they analyse the NPK and other micronutrients. Farmers can easily test their soil samples through KVK so they can improve soil fertility for crop production.

Field Visit Report of KVK Buldana

KVK organizes annual visits and arranges various programs throughout the year to create environmental awareness among people. So we can conclude that the KrishiVidnyan Kendra is a multi-purpose spot in the city stocked up with various activities for the people living in our city and the people visiting too.

On this visit we got to learn new technique of propagation and cultivation. This tour helps us improving basic principles in plant propagation of horticultural plants, Practical, hands-on experience in plant propagation methods, Principles, practices and skills required in the culture and management of nursery plants. We thoroughly enjoyed our a kind of short tour and with lot of knowledge we finally got home.
