

ACTION TAKEN REPORT

PARTICIPATION IN STUDENT RESEARCH COMPETITION

AVISHKAR - 2024-25

Objectives

- i) To introduce the students the search area of English Language.
- ii) To impart knowledge to students about method and procedure to carryout research in the area of English language.
- iii) To propagate among students that they can apply Mind Mapping Technique to learn English Vocabulary.

Action Taken Report

- 1) It is decided by the Faculty of the Department of English to motivate students to participate in student research competition Avishkar 2024-25.
- 2) Notice regarding participation in the research competition was circulated among students.
- 3) The interested students were asked to give presentation on the research topics selected by them.
- 4) The Research Project titled Mind Mapping Technique For Vocabulary Development was presented by *Ritesh Bharat Nade and Harshal Sudhir Dhanlobhe* from B. Sc. First year was year was selected.
- 5) The script of the project was modified by Dr.S. I. Jukkalkar, the mentor of the students. Mr. Sanket Rindhe also worked to guide the students.
- 6) Students were given detailed information regarding the topic of the project. The students were also suggested to refer reference books and material on internet.
- 7) Based on the study the research students prepared the presentation of the project.

8) The first round of the research competition was organized at Rajashri Shahu College of Pharmacy, Buldana On 25th, October 2024. In this round the research project was awarded First Prize.

9) The students presented the project in Avishkar at University Level on 23rd December, 2024. The research students demonstrated the project very enthusiastically. The panel of jury appreciated the project.

Outcomes

- i) The participant students were introduced to the research area of English Language.
- ii) Students came to know the method and procedure to carry out research in the area of English language.
- iii) The Participant students and those who observed the presentation of the project came to know that the English language learners can apply Mind Mapping Technique to learn English Vocabulary.

Abstract of the Project

Mind Mapping Technique For Vocabulary Development

Mind Mapping is a great technique for vocabulary development. It helps learners visualize connections between words, making it easier to remember and understand new vocabulary.

Steps to Create a Vocabulary Mind Map:

1. Choose a Central Word:

- Start by selecting a word you want to learn or explore. Write it in the center of the map or page.

2. Add Main Branches:

- Think of main categories related to the word. For example, for the word "travel," you might have branches like "types," "places," "verbs," "adjectives," etc.

3. Add Sub-Branches:

- Under each main branch, add related words. For "types" of travel, you could write "business travel," "leisure travel," "adventure travel," etc.
- For "verbs," add action words like "fly," "drive," "sail."

4. Use Colors and Images:

- To make your map more memorable, use different colors for different branches and add pictures or symbols that represent the words.

5. Group Synonyms and Antonyms:

- Include synonyms (similar words) and antonyms (opposite words) for your central word on separate branches to expand your vocabulary.

6. Example Sentences:

- Add a few branches for example sentences using the new words. This helps with understanding how to use the words in context.

7. Review and Expand:

-

Example: Vocabulary Mind Map for "Travel"

- **Travel** (central word)
 - **Types:** business travel, leisure travel, adventure travel
 - **Verbs:** fly, drive, sail, explore
 - **Places:** airport, hotel, beach, mountains
 - **Adjectives:** exciting, tiring, expensive, adventurous
 - **Synonyms:** journey, trip, voyage
 - **Antonyms:** stay, remain, home

Conclusion: Lack of vocabulary is the major problem of students. This way, a mind map can make learning new vocabulary easy. As a result of systematic planning of study through mind map technique, English Language will be developed.
