Introduction:

In today's world, Internet has touched every aspect of life. With the growing use of the internet by people, protecting important information has become a necessity. A computer that is not having appropriate security controls can be infected with malicious logic and thus any type of information can be accessed in moments. Number of infected Web Pages and malicious websites can be seen every day that infects the computer and allow hackers to gain illegal access to other computer systems.

Cyber security is very important because of some security threats and cyber-attacks. For data protection, many companies develop software. This software protects the data. Cyber security is important because not only it helps to secure information but also our system from virus attack.

Social networking sites have become the most popular medium for sharing information and connecting with other people. But these sites have created varied opportunities for cyber crimes, compromised personal identities and information leakage. Therefore, it is important for individuals to understand how to protect against cyber threats, and must also comprehend the difference between virtual and real world. One should learn how to protect computers and personal information, from being hacked and should engage in appropriate online behavior in order to eliminate changes of cyber threats and thereby creating a safer online environment.

Cyber security is of paramount importance for government organizations also and is a vital asset to the nation. The increasing use of the internet and social media has made cyber security even more important than it was before. Growing cyber threats such as data theft, phishing scams

and other cyber vulnerabilities demand that users should remain vigilant about protecting data. It is essential to understand the varied type of risks and vulnerabilities that exists in the Internet world. For every user, it is important to think before connecting to someone using online medium. Users should also think prior to sharing any information with other users through the internet.

Objective:

1. To evaluate the security and identify vulnerabilities in systems, networks or system infrastructure. It includes finding and attempting to exploit any vulnerability to determine whether unauthorized access or other malicious activities are possible.
2. To aware students/society with basic knowledge of cyber security.

The participant’s response is as follows.

No. of Participants	Out of Maharashtra							
	Maharashtra	Andhra Pradesh	Karnataka	Kerala	Puducherry	TamilNadu	MP	Uttarakhand
247	230	2	2	1	1	9	1	1

For the webinar the resource person was Dr. Arjun V. Mane, from Government Institute of Forensic Science, Nagpur.

Dr. A. M .Garode, Principal and Patron for Cyber Security webinar who always inspire and support us for such types of social events.

Dr. V.U. Pocchi, IQAC Coordinator, motivate to organized the Cyber Security webinar.

Dr. A.B.Kadam, Convener of the Cyber Security webinar. Dr. M.E. Jadhav, Coordinator and Dr. Sonali Gaikwad has been Technical Secretary for the Cyber Security webinar. Departmental members of Mr. R. P. Bhatkar and Mr. S. A. Chavan who helped for the successful conduction of webinar.

Feedback for Cyber Security Webinar

The feedback for Cyber Security webinar from the participants view was all over very good and very much informative Cyber Security webinar. The Webinar was perfectly well prepared. Nicely organized webinar important needful information & best organization. Very fruitful, significant and informative session.
