SOFT SKILLS DEVELOPMENT WORKSHOP-2022

Feedback Analysis and Action Taken Report

Sant Gadge Baba Amravati University Amravati and Shri Shivaji Science and Arts College, Chikhli jointly organized four-day Soft Skills Development workshop from 16th to 19th February 2022 by keeping the aim of holistic development of students and to fill the gap between the expectation of the industry as well as competitive examinations and the reality of students through this training programme. In this workshop total of 50 students were participated and focus was given on verbal, non-verbal, presentation, time management, interview, character, ethics and moral skills.

On the basis of oral and written feedback taken from students at the end of the workshop, it was concluded that the workshop was helpful in enhancing the overall personality of students. Most of the student's opinions were recorded regarding less time duration hence we are planning to conduct such workshops on a regular basis in the college campus for outgoing students.

HAPPY INTERNATIONAL
YOGA DAY

Organized By
Department of Physical Education & Sports
Shri Shivaji Science and Arts College, Chikhli Dist. Buldana (M. S.)

The banner features a central image of a person in a yoga pose against a sunset background. It includes the official logo of International Yoga Day on the left and the college's emblem on the right. The text is presented in a clear, bold font, with the quote in white and the date in a larger font.

The screenshot shows a Zoom meeting interface. The main window displays the same International Day of Yoga banner seen in the previous image. On the right side, there are three video thumbnails showing participants. The top thumbnail shows a man in a blue shirt, the middle one shows a woman in a red shirt, and the bottom one shows a group of people. The Zoom interface includes a top toolbar with icons for mute, video, chat, and other functions. The bottom of the screen shows the system tray with the date and time.

Cyber security is the protection of computer systems and networks from the theft of or damage to their hardware, software, or electronic data, as well as from the disruption or misdirection of the services they provide.

It is organized to focus the attention towards cyber security. Webinar will help for further research interests for advances in computer science and IT among researchers in this area. We expect to explore the novel concepts and ideas in the field of Cyber security.

for social awareness and beneficial for the society to fulfill such motto we are organizing “Cyber Security” webinar The field is becoming more important due to increased reliance on computer systems, the Internet and wireless network standards such as Bluetooth and Wi-Fi, and due to the growth of "smart" devices, including smartphones, televisions, and the various devices that constitute the "Internet of things". Owing to its complexity, both in terms of politics and technology, cyber security is also one of the major challenges in the contemporary world.

In today's world, cyber security is very important because of some security threats and cyber-attacks. For data protection, many companies develop software. This software protects the data. Cyber security is important because not only it helps to secure information but also our system from virus attack.

Internet has touched every aspect of life. With the growing use of the internet by people, protecting important information has become a necessity. A computer that is not having appropriate security controls can be infected with malicious logic and thus any type of information can be accessed in moments. Number of infected Web Pages and malicious websites can be seen every day that infects the computer and allow hackers to gain illegal access to other computer systems.

In today's dynamic environment, cyber security has become vital for individuals and families, as well as organizations (such as military, government, business houses, educational and financial institutions, corporations and others) that collect and store a wide range of confidential data on computers and transmit that to other computers across different networks. For families, protection of children and family members from cyber crime has become substantially important. For an individual, protecting information that could impact social life as well as personal finance is essential. The internet has provided a wide array of learning opportunities, but there are risks too. Photos, videos and other personal information shared by an individual on social networking sites such as Facebook, Twitter can be inappropriately used by others may lead to serious and even life-threatening incidents. Social networking sites have become the most popular medium for sharing information and connecting with other people. But these sites have created varied opportunities for cyber crimes, compromised personal identities and information leakage. Therefore, it is important for individuals to understand how to protect against cyber threats, and must also comprehend the difference between virtual and real world. One should learn how to protect computers and personal information from being hacked and should engage in appropriate online behavior in order to eliminate changes of cyber threats and thereby creating a safer online environment.

Cyber security is equally important for local, state, and central government as these organizations maintains a huge amount of confidential data and records concerning the country and its citizens. Yet several government organizations face difficulty in protecting data because of inadequate secured infrastructure, limited funding and lack of security awareness. Stealing of confidential data or sensitive information, digital by terrorists from government organizations, as well as digital spying can lead to serious threats on a country. For this reason, cyber security is of paramount importance for government organizations also and is a vital asset to the nation.

The increasing use of the internet and social media has made cyber security even more important that it was before. Growing cyber threats such as data theft, phishing scams and other cyber vulnerabilities demand that users should remain vigilant about protecting data. It is essential to understand the varied type of risks and vulnerabilities that exists in the Internet world. For every user, it is important to think before connecting to someone using online medium. Users should also think prior to sharing any information with other users through the internet.
